explicitly available at compile time, enabling a complete check of them by the compiler, leading to early detection of errors and a fast

The programmer must put the `target` attribute on any variable which might be pointed

4 Teaching F

F is being used to teach the introductory one-semester programming course at Ventura College. The only prerequisite is college algebra. The course is taken primarily by

5 The Origins of F

Compilers for F are now available for Windows 95/NT, Windows 3.1/DOS, most UNIX machines, and the Macintosh Po
